

Diffuser

Assembly Guide

Welcome

Thanks for choosing our Diffuser! We've worked hard to bring you the most effective solution to not only make your room sound better, but look better, while staying true to our sustainable ethos. The Diffuser was designed in partnership with Output, and sent with our best intentions to help you change your studio into a fully outfitted creative space.

Enjoy,

The De-Fi Team

Terms & Conditions

1. The assembly and installation of Products purchased by a Customer shall be performed by the Customer at the Customer's own responsibility.
2. De-Fi Systems LLC, Output Inc., or any licensed reseller shall not assume any legal liability in relation to the assembly and installation of Products. De-Fi Systems LLC, Output Inc., or any licensed reseller shall not assume legal liability for damages caused to the Product or other accidents caused or damages incurred while the Customer is assembling or installing the Products.

Start Here

On this page you'll find an inventory of what is included in the box. It's a good idea to give it a thorough review before you begin.

The Diffuser comes assembled, and the holes in the back allow it to be mounted in both vertical and horizontal orientations. Attach the Z-Clips to the appropriate spots for the desired orientation, with the open gap below the screws (pointing down). Stick the bumpers on, well below the clips, as shown on the diagram. The bumpers are the same height as the Z-Clips, and will keep the Diffuser hanging flat against your wall.

Determine where you would like to hang your Diffuser, and mark your wall accordingly, using the measurements provided on the diagram. The most common placement is behind the listening position. Attach the corresponding Z-Clips to the wall with the open gap above the screws (pointing up). In addition to the Z-Clips, screws and drywall anchors are provided. If you are attaching to studs, you do not need to use the anchors. Please keep in mind that if your walls are not drywall, you will need to get the proper fasteners for the type of surface that you will be drilling into.

California Prop 65 Warning

In manufacturing some of the materials used for this product, chemicals that contain substances known to the State of California to cause cancer and birth defects or other reproductive harm were used.
