

# Wall & Ceiling Mount

## Assembly Guide

### Welcome

Thanks for choosing our Absorber system! We've worked hard to bring you the most effective solution to not only make your room sound better, but look better, while staying true to our sustainable ethos. This system was designed in partnership with Output, and sent with our best intentions to help you change your studio into a fully outfitted creative space.

Enjoy,

The De-Fi Team

### Terms & Conditions

1. The assembly and installation of Products purchased by a Customer shall be performed by the Customer at the Customer's own responsibility.
2. De-Fi Systems LLC, Output Inc., or any licensed reseller shall not assume any legal liability in relation to the assembly and installation of Products. De-Fi Systems LLC, Output Inc., or any licensed reseller shall not assume legal liability for damages caused to the Product or other accidents caused or damages incurred while the Customer is assembling or installing the Products.

### Start Here

On this page you'll find an inventory of what is included in the box. It's a good idea to give it a thorough review before you begin.

This assembly guide corresponds with the large mounting template. You can use this template to mount on your walls and ceiling, in both vertical and horizontal orientations.

Before using the template, it is very important to level it. You can do this by measuring from the ceiling, using an actual level, or using a level app with your smartphone. If you don't get this right, the column will be crooked. Once you've confirmed it's level, use non-marking masking tape, attach it to your mounting surface, and use the screw guide holes to mark out where you will need to drill or screw in the mounting plates to your wall with the appropriate fasteners. Provided with this system are screws and drywall anchors. If you are attaching to studs, you do not need to use the anchors. Please keep in mind that if your walls are not drywall, you will need to get the proper fasteners for the type of surface that you will be drilling into.

Once you have the holes marked, assemble the system as shown.

One last note, the connector mounts have two screw holes on them to allow them to be used on either side. However, make sure to use the lower hole as shown on the diagram. Using the lower hole seems counterintuitive, but that allows access to the screw hole with a panel in place, which can be helpful with assembly.

### California Prop 65 Warning

In manufacturing some of the materials used for this product, chemicals that contain substances known to the State of California to cause cancer and birth defects or other reproductive harm were used.

### Clean & Care Instructions

To keep your product in top form, clean mount surfaces with a dry or damp soft cloth. Avoid abrasive cleaners, furniture wax or polish. For the panels, occasionally vacuum them with an attachment. If something is spilled on the panels, some mild carpet cleaners can be used, but test on a small part of the back of a panel before using on a large part. De-Fi and any reseller is not responsible for any damage caused by cleaning.
